

MANAN UPADHYAY

Full Stack Developer | React.js, Next.js, Node.js, TypeScript

+91 9173949408 | upadhyaymanan01@gmail.com | upadhyaymanan.in | [LinkedIn](#) | [Github](#) | Ahmedabad

PROFESSIONAL SUMMARY

Full Stack Developer with **5+ years** of experience building production web applications using React.js, Next.js, Node.js, TypeScript, Express.js, MongoDB, and PostgreSQL. Experienced across finance, healthcare, logistics, CRM/ERP, SaaS, media-heavy, and visualization-driven platforms. Strong in **frontend architecture, performance optimization, API integration, authentication/RBAC, reusable UI systems, and end-to-end feature ownership**. Uses AI-assisted tools to improve delivery speed while maintaining manual code review, debugging, and production-quality standards.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, ShadCN, Highcharts

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, OAuth, RBAC, WebSocket, Cron Jobs

Databases: MongoDB, PostgreSQL, MySQL, Firebase Firestore, Firebase Realtime Database

State & Libraries: Redux, Redux Toolkit, React Query, React Hook Form, Context API, Mongoose, Recharts, TensorFlow.js

Auth & Integrations: Okta, Auth.js/NextAuth, Firebase Auth, LaunchDarkly, Adobe Analytics, third-party APIs

DevOps & Collaboration: Git, GitHub, Bitbucket, Splunk, Jira, Postman, Confluence

Performance & Media: Caching, CDN, Cloudflare R2, Cloudinary, Image Optimization, Video Optimization, Code Splitting, Lazy Loading, Bundle Optimization

Testing & Quality: Cypress, Storybook, ESLint, API Testing, Code Reviews, Regression Testing

AI Tools: Cursor, GitHub Copilot, Claude, ChatGPT, Gemini

Additional Exposure: Java, Spring Boot, Docker, Helm, Harness, AWS Parameter Store

PROFESSIONAL EXPERIENCE

Full Stack Developer | Inexture Solutions | Ahmedabad

Jan 2022 – Present

- Delivered production-grade web applications across finance, healthcare, logistics, CRM/ERP, SaaS, media-heavy, and visualization-driven platforms using React.js, Next.js, Node.js, Express.js, NestJS, MongoDB, and PostgreSQL.
- Built end-to-end frontend features from **requirement grooming and task breakdown** to implementation, API integration, QA support, release validation, and production monitoring.
- Developed secure **authentication and authorization flows** using JWT/OAuth, Okta, Auth.js, RBAC, middleware-based access control, and dynamic user access conditions.
- Improved frontend performance through code splitting, lazy loading, caching, image/video optimization, CDN usage, React Query caching, and reusable component architecture.
- Worked with **feature flags, CI/CD, observability, and deployment-support tooling** including LaunchDarkly, Harness, Docker, Helm, AWS Parameter Store, and Splunk.
- Mentored junior developers through code reviews, reusable patterns, debugging support, and implementation guidance.

Frontend Developer | Horizon Tour and Travels | Ahmedabad

May 2021 – Dec 2021

- Developed CRM modules and responsive React UI components for customer, lead, and sales workflows.
- Implemented PDF and Excel exports for reporting, reducing manual data work by **16–20 hours per week**.
- Optimized client-side rendering and UI performance, **reducing initial load time by 38%**.
- Participated in client demos, requirement discussions, and feedback cycles to improve feature acceptance and delivery speed.

SELECTED PROJECTS

Advisor Portfolio Snapshot | Capital Group (USA)

Advisor-facing portfolio analysis platform built with Next.js, Okta authentication, Highcharts, data tables, feature flags, and enterprise deployment tooling.

- Built the frontend application from scratch using Next.js, including **system design**, reusable UI structure, route protection, API integration, and sprint-wise feature delivery.
- Integrated Okta OAuth with Auth.js and developed **server-side middleware authorization logic** to restrict access based on dynamic user and environment conditions.
- Built portfolio analysis views with data tables and Highcharts, enabling advisors to compare selected portfolios against model and average portfolios through interactive digital reports.
- Integrated LaunchDarkly feature flags, verified disclosures, documented technical designs in Confluence, and supported **release debugging** through Harness and Splunk.
- Contributed to a **Spring Boot backend service for server-side PDF report generation** by normalizing data from internal services and mapping it into report templates.

Gajaakriti Studio | Luxury Wedding Photography & Films Website

Dynamic media-heavy website and admin panel for a premium Ahmedabad-based wedding photography and films studio.

- Built a modern Next.js website with dynamic landing pages, portfolio pages, blogs, testimonials, media-heavy sections, and an **admin panel for content management**.
- Improved performance for high media consumption through **caching, CDN strategy, image/video optimization**, Cloudflare R2, video streaming integration, and optimized upload workflows.
- Implemented Firebase Auth and Firestore for authentication, user management, soft deletion, media handling, and dynamic content mapping.
- Built Bash scripts to batch-compress images and videos before upload, reducing **hosting and bandwidth usage** while maintaining visual quality.

Royal Tiles Playground | Custom Tile Visualization Tool

Interactive tile design and ordering tool for a cement-terrazzo and boutique tile manufacturer.

- Built a custom floor visualization tool where users can select floor layouts, tile designs, fills, and quantities, preview the result live, and download order-ready PDF templates.
- Programmatically rendered dynamic tile variants such as inner corners, outer corners, fills, and grid-based patterns for customizable floor layouts.
- Developed an admin panel for uploading tile designs, managing floor layouts, enabling/disabling fills, and publishing tile configurations through a clean UX.
- Built a **TensorFlow.js image-processing workflow** to convert uploaded PNG tile designs into region-based SVGs with threshold controls and grouped fill regions.
- Added product tours, help drawers, and shortcut-key interactions to improve usability for both admins and end users.

Digital Investor Portfolio | Capital Group (USA)

Digital investment platform with rich user interactions, analytics tracking, and frontend/backend feature modules.

- Delivered React/Next.js feature modules and integrated Adobe Analytics tracking to improve user interaction visibility.
- Supported Node/Express REST API integrations, error handling, and performance improvements for investor-facing workflows.
- Implemented **React Query** for server-state management, reducing redundant API calls and improving perceived UI performance.

EDUCATION

Bachelor of Engineering in Information Technology | Gujarat Technological University | 2022

CGPA: 8.36/10
